H13: cut the wool and leave a long thread to sew the nose to the cat's face

How to create eye sockets for cats:

The two eyes are 10 stitches apart

Thread the long yarn into the needle (the needle is long). Pierce the first stitch, pull the yarn through, then stab it down to the stitch next to the thread, thread it behind the head like photo number 2, then pull the 2 yarns tightly and hide the yarn (remember The puncture location in the back of the head must be the same hole ^___^)

For the second eye, we do the same, the two eye holes are 10 stitches apart

After that, you can create the face as you like. If you don't like making eyes like me, then attach plastic eyes (usually, I don't use dowels but inject plastic glue, this way I don't have to worry about falling off :D:D:D)

After sewing the nose and stuffing it with cotton to create volume, use a black wool needle to stab the middle of the nose and pull it tight as shown in the picture below.

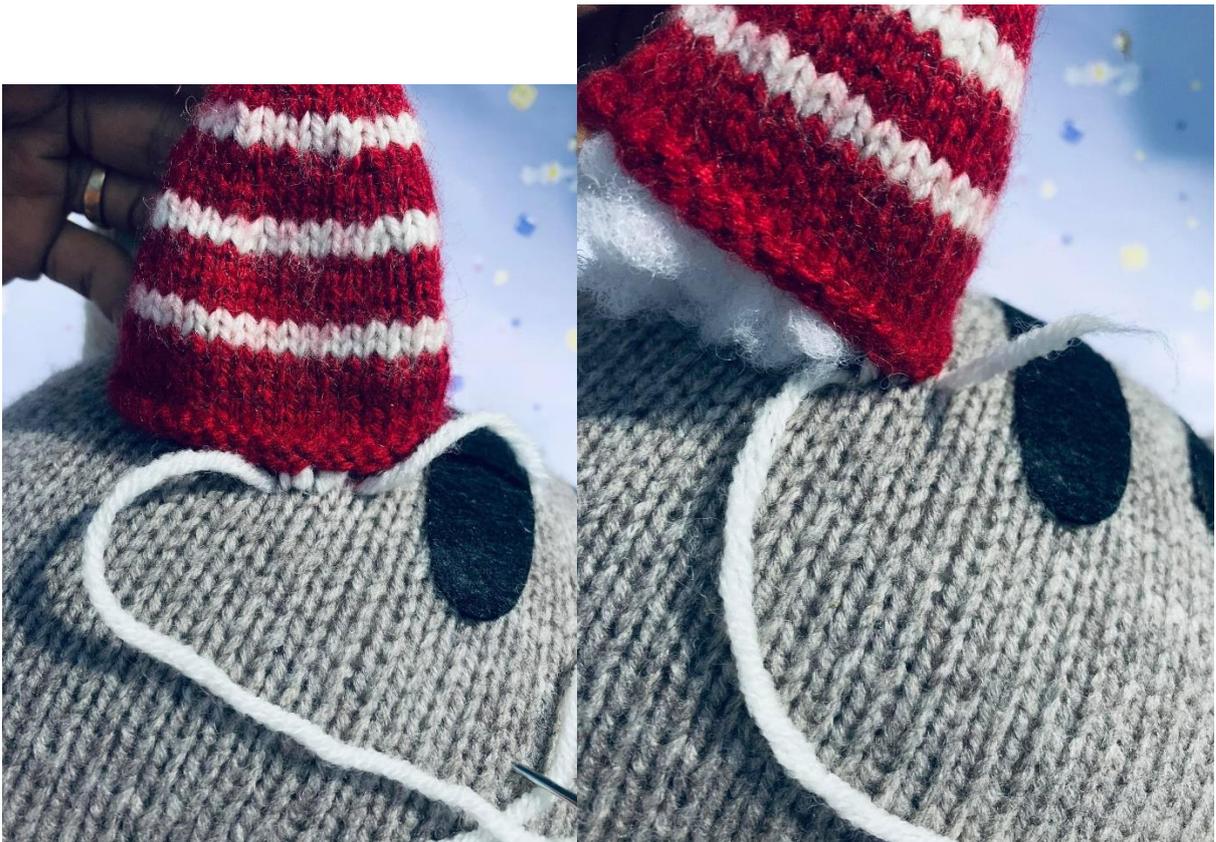

Sew the stuffed body and tighten the neck:Insert a hard milk tea straw between the face and body to make the head stronger. I insert 2 straws (remember to insert them long along the head and body).

Sew the hat to the head:

Stuff the hat to create a standing shape

Use black felt fabric to cut 2 pieces 15cm long, 2cm wide and 1 piece 20cm long, 2cm wide

Then use plastic glue to balance it on the cat's head! Stick the longest piece on the middle and the 2 shorter pieces on both sides for symmetry! :D

I wish you success dentist! Thank you very much! _____^
