Note

This pattern is a written pattern included charts.
For those who find it challenging to read charts, there is also a written version where sections of the chart are written out in detail.

The "Peanut Pain(Bread) Sweater" is a top-down design that begins with the neckband in the round. After completing the neckband, the yoke is formed with raglan increases, and short rows technique is used to create a neckline. The entire sweater, except for the band, features a peanut pain stitch pattern. Because of its top-down construction, adjusting the sleeve length and body length is straightforward, and you may require more or less yarn than the specified sizes if you choose to knit it differently.
